Token has also whitelisting, manual burn function, deflation and taxes on/off. You can set any tax or deflation to 0 if you don't want to use it. Owner address is whitelisted by default so when testing try to send between two not whitelisted addresses

Token Sales : Simple HTML

DApp : 699\$ + 1BNB

- 1. Token address**
- 2. Currency that you want to raise**
- 3. Token price**
- 4. Dates : From-To/Unlimited**
- 5. Softcap & Hardcap**
- 6. Min & max contribution**
- 7. Tokens distribution**
- 8. Emergency withdrawal**
- 9. Referral program**
- 10. Token sale information :**
 - Logo**
 - Discription**
 - Social Media Links**
 - Your Website**
 - 5% Fee Will Be Charged By BlockChain**

Token Lock : Simple HTML

DApp : 699\$ + 1BNB

- Token address
- Token to lock
- Quantity to lock

How many tokens you want to lock.

- Unlock terms (All At a Time / Linear Vesting)
- First Unlock Date
- First Unlock %

How many % of tokens will be unlocked at first unlock / TGE.

- Short description / name (You can add some description or name for this token locker - e.g. 'Team tokens', 'LP tokens'...)

Token Staking : Simple HTML

DApp : 799\$ + 1BNB

- Token address
- Staking terms

Fixed : Under fixed term staking, rewards are capped at the end of the staking period. To earn further rewards, users must actively re-stake their tokens. For example, if a user stakes for 100 days and chooses to unstake after 150 days, user will receive rewards only for the initial 100 days.

Flexible : Flexible staking enables continuous reward accumulation with no set end date. Staked tokens will earn interest at the specified annual rate (APY) until user decides to unstake them. For example, staking for 100 days and unstaking after 150 days means user will earn interest for the entire 150-day period.

- Allow /Not Allow early unstaking
- Staking plans : DURATION & APY CAN ADD Upto 10
